9. Your search statement and results are shown in the Search History box with the results listed below.
10. You can save this search to use later in combination with subject searches (see next page)
Finding Occupational Therapy Journals in CINAHL

Combining a journal search with a subject search

11. In the Search History/Alerts box, you can now combine S1 with any other subject search result set.

12. This example also demonstrates the power of searching by both keyword and subject headings and for combining individual sets with **AND** and **OR**:

   a. The keyword (S2) and Subject Heading (S3) sets for wheelchairs have been combined with **OR** (S2 OR S3) [Note the use of the truncation symbol * to find both singular and plural forms.]
   b. The Pressure Ulcer sets have been combined with **OR** (S5 OR S6)
   c. These 2 sets of results have been combined with **AND** (S4 AND S7) to make set S8.
   d. This has been combined with the occupational therapy journal set S1 with **AND** (S1 AND S8).
