Welcome MPT students!

As your liaison librarians for the MPT an NMPT programs at UBC, we are here to teach and help you find relevant material for your course assignments and learning:

The orientation workshop on September 4th is designed to get you started with the best physical therapy resources quickly and easily. To get the most out of this session please visit the Orientation page of the Physical Therapy Research Guide at https://guides.library.ubc.ca/physicaltherapy/MPT_Orientation_2020.

Whether you are new to UBC, or wishing to review the library’s services, the orientation videos under Getting Started at UBC Library are a good place to begin. The videos will give you an overview of how to use the library as they include information on navigating the library’s website, how to do a general search, and on how to find books and journals.

Charlotte Beck, BA, MLIS
Liaison Librarian: Rehabilitation Sciences, History of Medicine and Science. Woodward Library, UBC
